Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1- 34 are rejected under 35 U.S.C. 112, first paragraph, because

The incorporation of essential material in the specification by reference to a foreign application or patent, or to a publication is improper. Applicant is

Art Unit: 1625

required to amend the disclosure to include the material incorporated by reference. The amendment must be accompanied by an affidavit or declaration executed by the applicant, or a practitioner representing the applicant, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. See *In re Hawkins*, 486 F.2d 569, 179 USPQ 157 (CCPA 1973); *In re Hawkins*, 486 F.2d 579, 179 USPQ 163 (CCPA 1973); and *In re Hawkins*, 486 F.2d 577, 179 USPQ 167 (CCPA 1973).

The attempt to incorporate subject matter into this application by a reference to WO-02/063141 , lines 4-6 on page 10 , lines 1-3 on page 16, is improper because , although the phrase “ a power cycle” is defined, the specification further gives the examples of “ power cycles, an organic rankine cycle, a kalina cycle, or a power cycle as described in WO-02/063141”, which has been incorporated into the specification. It is a foreign patent ; does not specify essential materials on the specification. Applicant is required to amend the disclosure to include the material incorporated by references and to accompany the amendment by an affidavit or declaration by the applicant.

The following is a quotation of the second paragraph of 35 U.S.C.

112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1625

Claims 1-34 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1, 9, 19, and 27, the phrase "a substantial portion" is recited. The expression is vague and indefinite because the term "substantial" offers no clear descriptive amount of the solvent to be removed in the separation zone in the process. Therefore, an appropriate correction is required.
